NEW

ALARMING RECOILER, 48" PLASTIC COATED STEEL CABLE

Alarming recoiling tether with 48" plastic coated steel cable. Includes a magnetically released locking device to form a loop around secured items. Unit features two alarm functions. Will alarm if the cable is cut anywhere along the length, or if it's removed from the mounting surface. May be permanently mounted using high strength VHB tape (included) or screws. Alarm may only be reset with the STC835-R remote. Uses one replaceable CR1632 battery.

STC835

NEW

ALARMING RECOILER, 48" REQUIRES DECODER TO REMOVE MERCHANDISE WITHOUT CAUSING ALARM, PLASTIC COATED

Alarming recoiling tether with 48" plastic coated steel cable. Includes a magnetically released locking device to form a loop around secured items. Unit features three alarm functions. Will alarm if unlocked without disarming using the special (STC835-R) decoder, or if the cable is cut anywhere along the length, or if it's removed from the mounting surface. May be permanently mounted using high strength VHB tape (included) or screws. Alarm may only be reset with the STC835-R remote. Uses one replaceable CR1632 battery.

STC849

NEW

ALARMING TETHER, FIXED (NON-RETRACTING) 48" PLASTIC COATED STEEL CABLE

Alarming fixed (non-recoiling) tether with 48" heavy duty plastic coated steel cable. Includes a magnetically released locking device to form a loop around secured items. Unit features two alarm functions. Will alarm if the cable is cut anywhere along the length, or if it's removed from the mounting surface. May be permanently mounted using high strength VHB tape (included) or screws. Alarm may only be reset with the STC835-R remote. Uses one replaceable CR1632 battery.

STC831

NEW

DECODER & MAGNETIC DETACHER

IR Decoder and magnetic Detacher for use with the STC8XX series alarming Tethers. Features a magnet for removing the lanyard or retractor mechanism at display rack and a IR beam for disabling the alarm feature on the tethers. Uses one replaceable CR1620 battery.

STC550

NEW

RETRACTOR MECHANISM - NO DETACHER

SenTech's innovative retractor has a heavy gauge plastic coated steel cable that securely attaches the tag detacher to the point of sale counter. It allows the detacher to be pulled out up to ten feet away from its mounting point to easily remove tags from large items that cannot be put on the checkout counter such as barbeque grills, generators, pressure washers, tools etc. Cable automatically retracts back into its housing when not in use. This version does not include a detacher.

STC550-5

NEW

RETRACTOR MECHANISM - ALLOWS OPEN DISPLAY MERCHANDISE

SenTech's innovative retractor allows retailers to display merchandise openly giving customers the opportunity to pick up and hold the merchandise. This helps customers to make buying decisions without having to wait for an associate to unlock display cases.

The retractor has a heavy gauge plastic coated steel cable that securely attaches the merchandise on display preventing theft.
